*Average: average of non-zero values for 23 years																		
2005 notes	No data on T,E, H from Ventura or Merced Cos.in 2005																	
2006 notes	6 counties which reported in 2005 did not report in 2006 & no data on T, E, H from Merced Co. in 2006																	
2007 notes ...	172 trails reported. Few major producers reported results																	
2008 notes ...	228 trails reported but several major producers did not report																	
2009 notes ...	265 trails reported - nest tries down but fledges up? Major producers from 2008 did not report																	
2010 notes ...	Nest Tries underestimated as many large producers did not provide bob-by-box detail; each species was reported as 1 box in these cases. Large increases in boxes, eggs, hatchlings and fledglings are primarily the result of Merced county reporting after a lapse of several years																	
2011 notes ...	Nest Tries underestimated as many large producers did not provide bob-by-box detail; each species was reported as 1 box in these cases. Ditto - boxes. All ratios based on nest tries or boxes are low as a result.																	
2012 notes ...	Nest tries and boxes much more realistic this year - accounts for large change in related ratios Based on trail results not box-by-box results																	
2013 notes ...	Ditto 2012																	
2014 notes ...	Reductions from 2013 are almost entirely explained by the illness of Dick Purvis, Orange County.																	
2015 notes ...	results are down 10% from pre-drought years (2010-2012)																	
2016 notes ...	results are slightly up from last year																	
2017 notes ...	results are similar to 2016; because of the rain in 2016/2017 I had expected much higher results
